 Basis of the 	report
-----------------------------------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	De	Description, Pages				
	1-1	6	as originally filed			
	Cla	ims, Numbers				
	8-2	3	as originally filed			
	1-7	, 24-31	filed with telefax on 14.10.2004			
	Cla	ims, Pages				
	18,	19	as originally filed			
	•	20, 21	filed with telefax on 14.10.2004			
	Dra	wings, Sheets	,			
)-10/10	as originally filed			
2.	With lang	With regard to the language , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.				
	The	These elements were available or furnished to this Authority in the following language: , which is:				
		the language of a translation	n furnished for the purposes of the international search (under Rule 23.1(b)).			
		the language of publication	of the international application (under Rule 48.3(b)).			
		the language of a translation Rule 55.2 and/or 55.3).	n furnished for the purposes of international preliminary examination (under			
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:					
		contained in the international	al application in written form.			
		filed together with the intern	ational application in computer readable form.			
		furnished subsequently to this Authority in written form.				
		furnished subsequently to th	nis Authority in computer readable form.			
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.				
		The statement that the information listing has been furnished.	mation recorded in computer readable form is identical to the written sequence			
١.	The	amendments have resulted	in the cancellation of:			
		the description, pages:

		the claims,	Nos.:						
		the drawings,	sheets:						
5.	5. This report has been established as if (some of) the amendments had not been made, since they been considered to go beyond the disclosure as filed (Rule 70.2(c)).								
		(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to the report.)							
6.	Add	dditional observations, if necessary:							
Ш	. No	n-establishment of o	pinion with re	gard to nove	elty, inventive step and industrial applicability				
 The questions whether the claimed invention appears to be novel, to involve ar obvious), or to be industrially applicable have not been examined in respect of: 									
		the entire internation	al application,						
	\boxtimes	claims Nos. 31							
because:									
	the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):								
		the description, claim unclear that no mear			ticular elements below) or said claims Nos. 31 are so ned (specify):				
		see separate sheet							
the claims, or said claims Nos. are so inadequately supported by the description that no meaningful o could be formed.									
		no international sear	ch report has be	een establish	ned for the said claims Nos.				
2.	 A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions: 								
☐ the written form has not been furnished or does not				not comply with the Standard.					
the computer readable form has not been furnished or does not comply with the Standard.									
٧.	Rea cita	soned statement un tions and explanatio	der Article 35(ons supporting	2) with rega such stater	ard to novelty, inventive step or industrial applicability ment

2. Citations and explanations

see separate sheet

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claim 31 contains references to the drawings. According to Rule 6.2(a) PCT, claims should not contain such references except where absolutely necessary, which is not the case here. Therefore this claim should be deleted.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following document:

D2: US5400466A (ALDERMAN, R. J. ET AL) 28 March 1995 (1995-03-28)

The document D2 is regarded as being the closest prior art to the subject-matter of 2 claim 1, and shows (the references in parentheses applying to this document; cf. figures 1 and 2):

An agitation apparatus (4) for a cleaning appliance (2) comprising generating means (16) for generating alternating pressure waves.

The subject-matter of claim 1 differs from this known agitation apparatus in that the agitation apparatus further comprises: a first fluid flow path with an inlet/outlet port and a second fluid flow path with an inlet/outlet port, the area adjacent the inlet/outlet ports forming an agitation region, wherein the generating means is arranged to generate a first alternating pressure wave along the first fluid flow path and a second alternating pressure wave along the second fluid flow path, the first and second pressure waves being substantially in anti-phase with one another.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as to improve 2.1

the agitation apparatus known in D2 by eliminating the tendency of the loudspeaker cone to be sucked towards the source of suction.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT), because it is neither known nor suggested in the prior art.

- 2.2 Claims 2-21 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
- Independent claims 22, 29 and 30 relate to subject matters, which explicitly comprise 2.3 the agitation apparatus according to anyone of claims 1 to 21 and as such also meet the requirements of the PCT with respect to novelty and inventive step. This applies equally to claims dependent on these independent claims.
